**INTERVIEW SUMMARY**

Sir:

The undersigned acknowledges the Examiner's interview summary dated July 25, 2005. The undersigned agrees with and would further like to supplement the Examiner's summary of the interview. The undersigned reminded the Examiner that

during the interview of February 23, 2005, the Examiner acknowledged that there was sufficient support in the specification for the control means as corresponding to the controllable hydraulic unit 12, the lever 11, and the needle 9 in a means plus function clause. The undersigned further suggested clarifying the function by reciting "a control means for opening the shut-off means in controlled manner." Upon reviewing the specification, the Examiner agreed during the present interview that there is support in the specification for the proposed means plus function clause. In particular, the Examiner reviewed and discussed page 2, lines 30-33, and page 3, lines 1-12 as support for the means plus function language. The Examiner then turned to the possibility that the term "control means" may be broadening under MPEP 2163.05. The Examiner did not explain why this term may be broadening.

If any issues remain which may be resolved by telephonic communication, the Examiner is respectfully invited to contact the undersigned at the number below, if such will advance the application to allowance.

Respectfully submitted,

  
Yan Glickberg
